

**Release Notes for the Manifesto Project Dataset / MARPOR Full Dataset:  
Updates (2011-2023a, changes, corrections, and known errors)**

## MARPOR Full Dataset 2023a: April 2023 Version

### **Dataset integration**

We have merged the main project dataset with the South America dataset, so that from now on datapoints from both datasets are contained in a single common dataset. Older separate versions of both main and South America datasets are still available on our website. For South America this changes the handling of the aggregation of subcategories: the main categories contain the summed values of the subcategories (excluding 202\_2, 605\_2 and 703\_2). Explanations and handling recommendations are available in our codebook. We have also extended our South America coverage, now including elections for Colombia, Costa Rica, Dominican Republic, Ecuador, Panama and Peru.

### **Elections added:**

- Australia 2019
- Chile 2021
- Colombia 1998, 2002, 2006, 2010, 2014, 2018
- Costa Rica 1990, 1994, 1998, 2002, 2006, 2010, 2014, 2018
- Dominican Republic 1996, 2000, 2004, 2008, 2012, 2016
- Ecuador 1996, 2002, 2006, 2009, 2013, 2017
- Greece 2019
- Iceland 2021
- Lithuania 2020
- Netherlands 2021
- Panama 1994, 1999, 2004, 2009, 2014, 2019
- Peru 2006, 2011, 2016
- Serbia 2022

### **Digitalization and Alignment**

- We digitized 4 older manifestos (including the codes) which might result in minor changes to per-variables. The following manifestos are affected: (party\_date)

– Russia: 94221\_200712, 94711\_200712, 94901\_200712, 94951\_200712

**Corrections and changes:**

- We had wrongly assigned the presidential election results for the US election in 2004 for the Democrats (61320) to the Republicans (61620) and vice versa. We corrected both presvote values with this Update.

## MARPOR Full Dataset 2022a: August 2022 Version

### **Elections added:**

- Armenia 2017, 2018, 2021
- Belgium 2014 (Wallonia)
- Georgia 2020
- Germany 2021 (SSW party)
- Japan 2017
- New Zealand 2020

### **Corrections and changes:**

- We replaced data for one observation:
  - Polish Party "United Left" (92022) in 2015: we had coded the wrong manifesto before, it was replaced by the correct one.
- We changed four party family codings:
  - "Coalition for a United and Democratic Bosnia and Herzegovina" (79421) to 98 (electoral alliances)
  - "Coalition of the Croatian Peasant Party, the Croatian Social-liberal Party and the Primorian-Goranski Union" (81041) to 98 (electoral alliances)
  - "Burjanadze - Democrats Bloc" (84430) to 98 (electoral alliances)
  - "Election Bloc 'For a New Georgia'" (84432) to 98 (electoral alliances)
- We corrected the "manual" variable values from 5 to 4 for dutch manifestos of the following parties:
  - "Reformatory Political Federation" (22528) in 1981 & 1982
  - "Communist Party of the Netherlands" (22210) in 1982
  - "Reformed Political League" (22527) in 1982
  - "Centre Party" (22710) in 1982
  - "Reformed Political Party" (22952) in 1982
- We coded and added six missing quasi-sentences to the Ukraine "Servant of the People" (98440) 2019 manifesto which results in minor changes to its per-variables.

- We changed the party id of Estonian party "Pro Patria Union" from 83710 to 83709.
- We fixed the election seat data for the Moldova and Ukraine 2019 elections to include both parts of their mixed electoral system.

### Digitalization and Alignment

- We digitized 73 older manifestos (including the codes) which results in small changes to their per-variables in 61 cases. The following manifesto are affected: (party\_date)
  - Russia: 94224\_199312, 94320\_199312, 94422\_199312, 94225\_199512, 94426\_199512, 94713\_199512, 94221\_199912, 94422\_199912, 94620\_199912
  - Slovakia: 96111\_199006, 96430\_199006, 96521\_199006, 96220\_199206, 96421\_199409, 96521\_199409, 96953\_199409
  - Ukraine: 98221\_199404, 98321\_199404, 98325\_199404, 98421\_199404, 98521\_199404, 98611\_199404, 98612\_199404, 98613\_199404, 98711\_199404, 98712\_199404, 98810\_199404, 98951\_199404, 98111\_199803, 98221\_199803, 98322\_199803, 98323\_199803, 98324\_199803, 98426\_199803, 98427\_199803, 98428\_199803, 98611\_199803, 98614\_199803, 98221\_200203, 98615\_200203, 98221\_200603, 98321\_200603, 98615\_200603, 98616\_200603, 98952\_200603, 98081\_200709, 98221\_200709, 98321\_200709, 98615\_200709, 98616\_200709, 98952\_200709, 98440\_201907
  - Romania: 93001\_200411, 93041\_200411, 93712\_200411, 93951\_200411, 93002\_200811, 93430\_200811, 93530\_200811, 93951\_200811, 93951\_201212

### Recodes

- We replaced the code frequencies for all observations from the Romanian elections 1996 and 2000 with the recodings conducted for Mapping Policy Preferences III. This lead to significant changes in all content analytical categories and changes in the rile. Consequently also all coder related variables have changed (variables "coderid", "coderyear", "testresult", "manual").The following manifesto are affected: (party\_date)
  - Romania: 93223\_199611, 93322\_199611, 93411\_199611, 93711\_199611, 93712\_199611, 93951\_199611, 93221\_200011, 93223\_200011, 93430\_200011, 93712\_200011, 93951\_200011

## MARPOR Full Dataset 2021a: October 2021 Version

### **Update of our Coding Handbook**

We have revised our Coding Instructions and have adjusted the description of some categories to make them more distinctive and to avoid potential overlaps between codes. The current version of the updated manual can be found here: <https://manifesto-project.wzb.eu/information/documents/handbooks>

### **Elections added:**

  - Armenian Revolutionary Federation (76321) in 2003 to 6 (general programme)
  - Prosperous Armenia (76620) in 2007 to 6 (general programme)
- We unified the party code 81223 with 81220 for the elections in 2000, 2003, and 2007. In 1995, we dropped party 81223 and kept only party 81220.
- The codings for Fidesz (Hungary, 86421) were harmonized. We dropped all codings referring to regional alliances under participation of Fidesz (86429, 86529, 86061) and summed up the vote shares (pervote) and number of seats (absseat). The code 86421 now refers always to Fidesz-led alliances.
- We added the results of the presidential elections in Mexico since 1946.
- We corrected the vote shares (pervote) for all political parties in the 2011 Slovenia election.

- We corrected the vote shares (`pervote`) and seats (`absseat`) for party 32521 in the 1996 Italian election.

### MARPOR Full Dataset 2019a: July 2019 Version

#### **Elections added:**

- Sweden 2018
- Iceland 2016
- Belgium 2014 (Flanders only)
- Italy 2018
- New Zealand 2017
- Turkey 2018
- Lithuania 2016
- North Macedonia 2016
- Slovenia 2014

#### **Corrections and changes:**

- We renamed Macedonia to North Macedonia.
- We corrected the party code of Syriza for the June 2012 election, where the party was already running as a party and not as an alliance anymore. Thus the party code was changed from 34020 (Syriza's alliance code) to 34212 (Syriza's party code).
- We corrected the variable *edate* in the following cases:
  - Israel 1959
  - Mexico 1946
  - Mexico 1955
  - Mexico 1961
  - Mexico 1967
  - Mexico 1976
  - Ukraine 2002

- South Africa 1994
- We corrected the variable *date* in the following cases:
  - Israel 1959
  - Portugal 1979
- We changed the proctype of a few documents:
  - Pact for Italy (32528) 1994 is a program of an electoral alliances and was corrected to 8 (Party bloc programme).
  - The Union – Prodi (32955) 2006 is a program of an electoral alliances and was corrected to 8 (Party bloc programme).
- We corrected the variables *pervote*, *absseat*, and *voteest* following newly established coding criteria for electoral alliances and the corresponding member parties (please see the Codebook for the corresponding coding rules). The following cases were affected (*party\_date*):
  - Albania: 75320\_199103, 75320\_199605, 75421\_199203, 75421\_199605, 75621\_199103, 75622\_199203, 75623\_199103, 75722\_199103, 75810\_199103, 75810\_199605

  - Spain: 33210\_201606
  - Ukraine: 98421\_199404, 98713\_199404
- We corrected the party family in the variable *parfam* for the following parties:
    - Belgian Vlaams Block (21914) to 70 (Nationalist)
    - Belgian Vlaams Belang (21917) to 70 (Nationalist)
    - Italian Partito Democratico (32440) to 30 (Social democratic)
    - Katter’s Australian Party (63710) to 95 (Special issue)
    - New Zealand First (64621) to 70 (Nationalist)
    - New Zealand’s Māori Party (64901) to 90 (Ethnic/regional)
    - Lithuanian Partija tvarką ir teisingumą (88460) to 70 (Nationalist)
  - We deleted the document of the Slovakian Smer (96423) in 2016 from dataset and corpus, as we had coded the wrong document.
  - We corrected codings in the document of the Green Party of Switzerland (43110) in 2015, as the first section of the document was not coded.
  - We corrected the vote shares of smaller parties – *pervote* – in the following cases (party\_date):
    - Albania: 75623\_199605, 75722\_199203, 75722\_199706, 75810\_199706

    - Mexico: 171601\_194607
  - We changed the variable *voteest* in the following case (party\_date):
    - Montenegro: 91710\_199611

## MARPOR Full Dataset 2018b: December 2018 Version

### **Elections added:**

- Norway 2013
- Portugal 2015
- Austria 2017
- Switzerland 2015
- United Kingdom 2017
- Australia 2016
- Czech Republic 2017
- Romania 2016
- Slovakia 2016
- South Korea 2016

### **Corrections and changes:**

- We changed various party family codings:
  - German AfD (41953) to 70 (Nationalist)
  - Portuguese PSD (76930) to 60 (Conservative)
  - Armenian Unity (M) (76903)
  - Norwegian Centre Democrats (13330) to 60 (Conservative)
  - Union of Macedonia (89227) to 30 (Social democrat)
  - Sri Lanka's United National Party (73330) to 60 (Conservative)
- We changed the progtype of a few documents:
  - Fidesz (86421) 1990, Alliance of Free Democrats (86422) 1994, Independent Smallholders' Party FKgP (86810) 1994 are summaries of the original programs and are therefore recoded to 9 (other document).

- Coalition of Coexistence and the Hungarian Christian-Democratic Movement ESWS-MKdH (96952) 1990 is a general program and was corrected to 6 (General program).
- We corrected and deleted codes in quite a number of documents where empty lines were assigned a code. The total number of codes affected per document is extremely small. The following documents are affected: party:date
  - 12320:200509, 12420:200509, 12520:200509,12620:200509,12620:200909,12810:200509,12951:200509,

## MARPOR Full Dataset 2018a: July 2018 Version

### **Elections added:**

- Cyprus 2016
- Mexico 2015
- Netherlands 2017
- USA 2016

### **Corrections and changes:**

- Changed parfam of the Dutch D'66 (22330) to 40 (Liberal)
- Corrected the coding of one quasi-sentence in the 2017 manifesto of the French Front National (31720)
- Corrected date and edate of an election in Northern Ireland from March 1963 to May 1962.
- Corrected date and edate for a Dutch election from 28 March 1971 (wrong) to 28 April 1971 (correct).

### **Digitalization and Alignment**

- We digitized a bunch of documents (including the codes) from the past. In some cases we corrected codes during this process, this is why the per-variables changed. You can use the Dataset Comparison Dashboard, if you want to have a closer at the specific changes. The following manifesto are affected: (party\_date)
  - Australia: 63620\_200111, 63810\_200111
  - Czech Republic: 82320\_200206
  - Hungary: 86220\_200204

## MARPOR Full Dataset 2017b: December 2017 Version

### **Elections added:**

- Austria 2013
- France 2017
- Germany 2017
- Israel 2006 & 2009
- New Zealand 2014
- Sweden 2014

### **Individual manifestos added or replace:**

We added manifestos of several smaller Dutch parties at past elections that gained seat(s) in parliament but were not included in the dataset or where we missed documents and these observations were interpolated from adjacent elections:

- Reformatory Political Federation (22528) in 1981
- Communist Party of the Netherlands (22210) in 1982
- Reformed Political League (22527) in 1982
- Reformatory Political Federation (22528) in 1982 (same manifesto used as in the 1981 election)
- Centre Party (22710) in 1982
- Reformed Political Party (22952) in 1982

### **Corrections and changes:**

- We corrected the party id of 55323 to 55322 (EDEK) in the 2001 election (this was incorrectly coded as another party)
- We corrected progtype of the alliance of the Israeli Labour Party with Democratic State (72323) at the 2003 election to 4 (manifesto taken from main party)

### **New variable:**

- We added the variable “id\_perm” as a last column to the dataset. This variable contains six-digit character vectors that permanently identify observations across different versions of the dataset. In most cases this can also be achieved by using party-date as identifier. However, we sometimes correct or change party codes between different dataset versions.

## MARPOR Full Dataset 2017a: July 2017 Version

### **Elections added:**

- Bulgaria 2014/2017
- Bosnia & Herzegovina 2006
- Croatia 2016
- Georgia 2016
- Ireland 2016
- Montenegro 2016
- Serbia 2016
- Spain 2016

Remarks: In Spain 2016, Podemos contested the election in several regional alliances which all published individual manifestos. However, Podemos also published a separate federal manifesto. We coded the separate as well as the regional alliance manifestos. Depending on the research question, scholars might have to drop the former ones or the latter. Votes and seats of the federal Podemos manifesto are set to zero because they are already included in the regional alliances. Please also note that many Spanish parties contested the June 2016 election with the same manifesto as at the December 2015 election.

### **Individual manifestos added or replace:**

- We added manifestos of several smaller Dutch parties that gained seat(s) in parliament but were not included in the dataset or where we missed documents and these observations were interpolated from adjacent elections:
  - Communist Party of the Netherlands (22210) in 1948
  - Reformed Political Party (22952) in 1948
  - Pacifist Socialist Party (22230) in 1986
  - Reformed Political Party (22952 ) in 1986 (replaced the coding to reduce the number of different coders at the same election)
  - Socialist Party (22220) in 1994 (replacement of an “estimate” that was based on the 2002 manifesto)
  - Reformatory Political Federation (22528) in 1998
- We added manifestos of several smaller Dutch parties that gained seat(s) in parliament but were not included in the dataset or where we missed documents and these observations were interpolated from adjacent elections:

- Republican National Party (74710) in 1954
  - Republican Peasants' Nation Party (74712) in 1961 (replaced “estimate”)
  - Republican Peasants' Nation Party (74712) in 1965 (replaced “estimate”)
  - National Action Party (74712) in 1969 (replaced “estimate”)
  - National Action Party (74712) in 1995
  - National Action Party (74712) in 2002
- Bosnia & Herzegovina 2002: For reasons related to the publication of Mapping Policy Preferences II (the first time the data on BiH 2002 was published) the election was not based on collected documents, but entirely based on the interpolation of observations from the previous election. We started to replace these observations with codings that are based on real documents published for the 2002 election for the following parties:
    - Social Democratic Party of Bosnia and Herzegovina (79321)
    - Party for Bosnia and Herzegovina (79723)
    - Party of Democratic Action (79951)
    - Alliance of Independent Social Democrats (79730)
- Replaced data for the following observations because we found better (longer) documents in Bulgaria:
    - Citizens for European Development of Bulgaria (80510) in 2009
    - National Union Attack (80710) in 2009

#### **Corrections and changes in electoral statistics:**

- Portugal: We corrected the vote shares of the Portuguese Social Democratic Party (35313) and the Social Democratic Center Party (35520) in 1980. These were switched.
- Australia: We corrected the vote share (pervote) for the Australian Greens (63110) in 2013 election.
- Latvia: We corrected the vote share (pervote) for the for the Latvian Way Union(87410) in 2002.
- Czech Republic: We corrected the vote share (pervote) for the Pensioners for a Life Security (82901) in 1996 and 1998, and for the Association for the Republic – Republican Party of ...(82710) in 1998 and 2002.
- Estonia: We corrected the vote share (pervote) for the Social Democratic Party (83410) in 2007.
- Turkey: We corrected some vote and seat statistics for various parties at various elections. We corrected the total number of seats in 1954, the number of seats (absseat) for the Republican People's Party (74321) in 1954 and the Democratic Party (74621) in 1995, the vote share (pervote) of the Grand Unity Party (74626) in 1999, and the Democratic Turkey Party (74627) at the 1999.

- Spain: We changed the parfam coding for the CiU (33611), the Forum Asturias (33612) and Geroa Bai (33091) to 90 (ethnic-regional).

**Minor changes to content analytical data:**

- Germany: Die Linke – Left Party (41223) in 2013: Very minor re-unitizing of a quasi-sentence resulting in one additional quasi-sentence coded as 106.
- Spain: Canarian Coalition (33907) in 2015: Very minor re-unitizing of quasi-sentences and recoding resulting in two more quasi-sentences coded with 411.

## MARPOR Full Dataset 2016b: December 2016 Version

### **Elections added:**

- Spain 2015
- Canada 2015
- Japan 2014
- Israel 2003/2015
- Croatia 2011
- Latvia 2011/2014

### **Individual manifestos added:**

- Reformed Political Party (22952: 1986 and 1989)
- Reformed Political League (22527: 1989)
- Reformatory Political Federation (22528:1989)
- Centre Democrats (22711:1989)

### **Recoded/replaced documents:**

- We substituted the document for the Canarian Coalition (33907: 2000) with the correct manifesto
- We replaced the code frequencies for several observations from the Austrian elections 1999 and 2002 with the recodings conducted for Mapping Policy Preferences III. Significant changes in all content analytical categories and changes in the rule up to 18 points (see below).

### **Changes due to the Alignment of the Manifesto Dataset with the Manifesto Corpus:**

- With this update we aligned the Main Dataset with the Manifesto Corpus (for more information on the Manifesto Corpus, please read: <https://manifesto-project.wzb.eu/information/documents/corpus>) . The code frequencies (per categories, rule, ...) from all documents that are also covered by the Manifesto Corpus are now automatically calculated from the Manifesto Corpus. This led to many very small changes in the content analytical categories in a large number of observations. Most of these changes are very small and due to the improved cleaning and code checking procedures that were applied when these documents were put into the Manifesto Corpus.

- We made an effort to digitize some documents that were coded on paper copies in the past. As these documents are now in the Manifesto Corpus, we re-counted the codes instead of using the old code frequencies from the dataset that were based on human counting. This produces some differences to the last version of the dataset due to counting errors and some coding corrections during the digitization procedure. This produces in many observations very small changes in the totals and per variables. In an extreme case (Danish Centre Party 13330 at the 1998 election) corrections of 20 codes that were wrongly counted as 505 instead of 506 change the rile by 18 points. A similar case is the Social Democratic Party’s manifesto (13320) at the same election where 21 codes were added that changed the rile by about 6 points.
- We added a variable *corpusversion* to the dataset. This variable indicates the version of the Manifesto Corpus used to calculate the code frequencies in the Main Dataset. The variable is missing for all documents that were not taken from the corpus, but are based on paper codings from the past. Thereby, it indicates for which observations in the Main Dataset annotations are available in the Manifesto Corpus.

### Overview of observations with significant changes due to the Corpus-Dataset alignment

- The following overview documents significant changes between version 2016b and version 2016a (for the above explained reasons). This list contains all observations with a change in rile larger than 1 or a change in the total number of quasi-sentences larger than 20:

#### Smaller corrections:

- Corrected the coderid for Montenegro 2002 elections
- Corrected the party id of an Israeli manifesto at the 1965 elections from 72323 → 72320
- Corrected the party id of a Slovenian manifesto at the 2001 election from 97620 → 97521
- Corrected the party id of a Mexican manifesto at the 1997 election from 171201 → 171101
- Corrected absseat for Social Democratic (35313) and the Social Democratic Center Party (35520) at the Portuguese elections in 1980 (they were switched)
- Corrected pervote for the Croatian HDZ in all elections.
- Corrected the party family coding for the Democratic Party of Socialists of Montenegro (91220) at the 1998 elections to be the same as in all other elections.

## MARPOR Full Dataset 2016a: May 2016 Version

### **Elections added:**

- Bosnia & Herzegovina 2010/2014
- Estonia 2015
- Greece January/September 2015
- Japan 2003/2005/2009/2012
- Latvia 2006/2010
- Moldova 2014
- Montenegro 2001/2002/2006/2009/2012
- Turkey June/November 2015
- UK 2015

Raw data (digitalized and annotated electoral programs) for most of these observations can be accessed via the Manifesto Corpus (see <https://manifesto-project.wzb.eu/information/documents/corpus>). These entries are based on version 2016-3 of the Manifesto Corpus.

### **Individual manifestos added:**

We added 12 electoral programs of (mostly) smaller Dutch parties, and one UK party:

- Communist Party of the Netherlands (22210:1946),
- Reformed Political Party(22952:1946,1994,1998,2002),
- Reformed Political League (22527:1994),
- Reformatory Political Federation (22528:1994,1998),
- Centre Democrats (22711:1994),
- General Elderly Alliance (22954:1994),
- Union55+ (22955:1994),

- Scottish National Party (51902:1997).

#### **New variables:**

- A new variable `datasetversion`, constant for all observations, indicates the version of the dataset. It helps keep track of the dataset version even if, for example, the filename is changed.
- We decided to split the information contained in the `partyname` variable (party abbreviation + partyname) into two variables in order to facilitate labeling graphs with party abbreviations. Now `partyname` only represents the name of the party, in English. The new variable `partyabbrev` represents the abbreviation of the party name.
- We added a new variable indicating a coder's reliability based on his/her coding of the entry test. This measure compares the sequence of codes from a coder's entry test to the sequence of codes from the master copy of the entry test. The new variable `testedsim` indicates the relative Levenstein distance between the two sequences of codes, and subtracts it from 1 (a value of 0 indicates no matching codes, 1 indicates all codes match).

#### **Corrections and changes:**

- 28 observations (elections from Hungary, Cyprus and Greece) coded with version 5 of the coding instructions incorrectly left out one new sub-category (606\_1:civic mindedness: general +) in the calculation of the `rile` variable. We corrected this. For these 28 observations this led to an average error of 2.2 in the `rile`. In four cases the `rile` error was more than 5, with a maximum error of 22.
- We completed the standardization the calculation of the coding reliability by slightly changing the coding of the entry test master copy of manual 4 and 5, and recalculated the reliability scores (Krippendorff's Alpha, variable `testresult`) of the coders that were trained with manual 4 or 5. This affects 456 cases. The change in Krippendorff's alpha for these cases ranges from  $-0.13$  to  $+0.23$  with a median of 0.003. We also added a new variable to measure the coding reliability called `testedsim`, see above.
- We substituted the document that was coded for the New Zealand National's Party from the 2011 election. The former coding was based on a speech, the new coding is based on the party's manifesto. All per variables, `progtype` and the indicators have changed.

#### **Smaller changes:**

- The Serbian Democratic party appeared twice in the dataset with different codes (79955 and 79952). We changed 79952 to 79955.
- The Democratic Party of Socialists of Montenegro (91220 and 91322) appeared twice in the dataset. We changed 91322 to 91220.
- The `manual` variable (indicating the version of the coding instructions used to code the program) was corrected and changed from 3 to 4 for the Lithuanian elections in 2008.
- We deleted the entry for the joint list bloc (81899) from the 2000 Croatian elections as it resulted in showing a higher number of seats than the size of the parliament. The observation for the electoral alliance first appeared with MPP2, and was an estimate based on codings from prior elections. It should have been but was not removed when the individual parties of the electoral alliance were coded and added to the dataset.

- We also deleted a single estimate for the Montenegrin 2002 election and replaced it with the coded 2002 manifesto.
- We set the pervote of the Fidesz-MPP-MDF alliance to 0, because the two parties are individually in the dataset with their respective voteshare.
- Changed parfam from 60 (conservative) to 20 (socialist) for the Progressive Party (61622), a minor US party from the 1948 election.
- We recoded some entries of parfam from 0 to 98 and other more meaningful codes to avoid the 0 parfam code. This only concerns electoral alliances.
- Changed the name of country 51 from “Great Britain” to “United Kingdom”.

## MARPOR Full Dataset 2015a: May 2015 Version

### **New elections:**

Armenia 2012, Cyprus 2006/2011, Greece 2007/2009/2012 May election/2012 June election, Hungary 2014, Macedonia 2014, Netherlands 2012

We replaced data for one observation:

- Protestant People's Party of Switzerland EVP (43530) in 2003: the manifesto was lacking the last page, it was replaced by the complete document

A note on the Greek data:

We advise to use the Greek data, in particular after the financial crisis, with caution for two reasons. First, collecting proper electoral programs is a challenge in Greece. In many cases, electoral programs in the classical sense do or did not exist. Many of the coded documents are the best equivalents that we could find, however some of them are very short and hardly cover a broad range of policy issues. Second, we advise to use other estimates than the rile for left-right positions. After the financial crisis a huge part of the political discourse in Greece was based on blaming the political elites for their failures. Such statements fall under the 305 category in the MARPOR scheme. Especially the Left parties (Syriza and KKE) blamed the former elites from PASOK and ND for the crisis. The rile score considers 305 as a right-wing category, moving these left parties to (extremely) right-wing positions. Considering 305 a right-wing category is definitely problematic in Greece and we advise to use other estimates than the rile to measure left-right positions in Greece.

### **Changes:**

For the first time, we release data coded with the new version of the coding instructions/category scheme (version 5). This version contains new subcategories which are easily identifiable in the dataset as they contain an underscore (eg. per301\_1). The first three digits indicate the main category to which they are related. The new coding instructions foresee that the new subcategories are used instead of the respective main categories. Currently, the new categories are aggregated into the former main categories according to the scheme below to ensure the over-time comparability of the dataset. So, scholars interested in long-time series can simply continue to use the existing main categories (per101-706, including eg. the rile) as they did in the past and ignore the new categories. Scholars interested in the new categories should be aware that the respective main categories of the new subcategories are aggregates of the new categories (i.e. if one uses the main categories together with the new subcategories the per-variables will likely add up to more than 100%). For more information on the new coding scheme, please visit our website.

To make data coded with version 5 comparable with data coded with former versions, the summed shares of the new subcategories can be aggregated to the share of the main category.

\*The only exceptions are the categories 202\_2, 605\_2 and 703\_2 which have to be added to the uncoded sentences, as such issues were not covered in the handbook 4 category scheme and these sentences were thus previously coded as 000.

	whole election - replacing existing data	Germany 1998 / 2002	All codings replaced by more recent recodings. The former coding of the Green party in 1998 was based on a bad proxy document (see Chapter on “Coder Training: Key to Enhancing Coding Reliability and Estimate Validity” for more details on the recoding). Therefore we replaced it. As we prefer (if possible) to provide data from the one coder for all parties from one election, we replaced the other data as well.
